

Lesson 3: Agentic Search

```
In [1]: # libraries
from dotenv import load_dotenv
import os
from tavily import TavilyClient

# load environment variables from .env file
_ = load_dotenv()

# connect
client = TavilyClient(api_key=os.environ.get("TAVILY_API_KEY"))
```

```
In [2]: # run search
result = client.search("What is in Nvidia's new Blackwell GPU?",
                       include_answer=True)

# print the answer
result["answer"]
```

```
Out[2]: "The new Nvidia Blackwell B200 GPU is the company's most powerful single-chip GPU, featuring 208 billion transistors. It is designed for AI applications and is capable of reducing AI inference operating costs and energy consumption by up to 25 times compared to the previous H100 GPU. Additionally, the Blackwell platform enables organizations to build and run real-time generative AI on trillion-parameter large language models at a significantly lower cost and energy consumption than its predecessor. Major organizations such as Amazon Web Services, Dell Technologies, Google, Meta, Microsoft, OpenAI, Oracle, Tesla, and xAI are expected to adopt the Blackwell platform."
```

Regular search

```
In [3]: # choose location (try to change to your own city!)

city = "San Francisco"

query = f"""
    what is the current weather in {city}?
    Should I travel there today?
    "weather.com"
    """
```

Note: search was modified to return expected results in the event of an exception. High volumes of student traffic sometimes cause rate limit exceptions.

```
In [4]: import requests
from bs4 import BeautifulSoup
```

```

from duckduckgo_search import DDGS
import re

ddg = DDGS()

def search(query, max_results=6):
    try:
        results = ddg.text(query, max_results=max_results)
        return [i["href"] for i in results]
    except Exception as e:
        print(f"returning previous results due to exception reaching ddg.")
        results = [ # cover case where DDG rate limits due to high deeplearn
                    "https://weather.com/weather/today/l/USCA0987:1:US",
                    "https://weather.com/weather/hourbyhour/l/54f9d8baac32496f6b5497
                    ]
        return results

for i in search(query):
    print(i)

```

```
